CASE CLOSED

CURATED BY HYENSTEEN & SREEVATHSAN

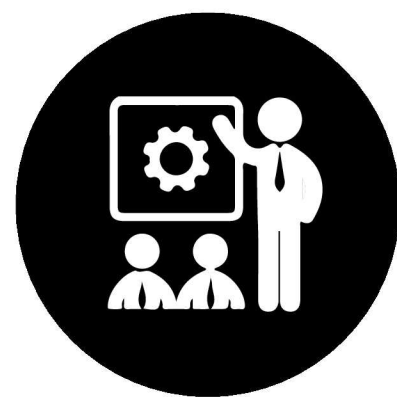

What is a Case Study?

- A consulting case study is a structured problem-solving exercise that mimics real business challenges.
- It helps consultants analyze and provide actionable recommendations for a specific issue.

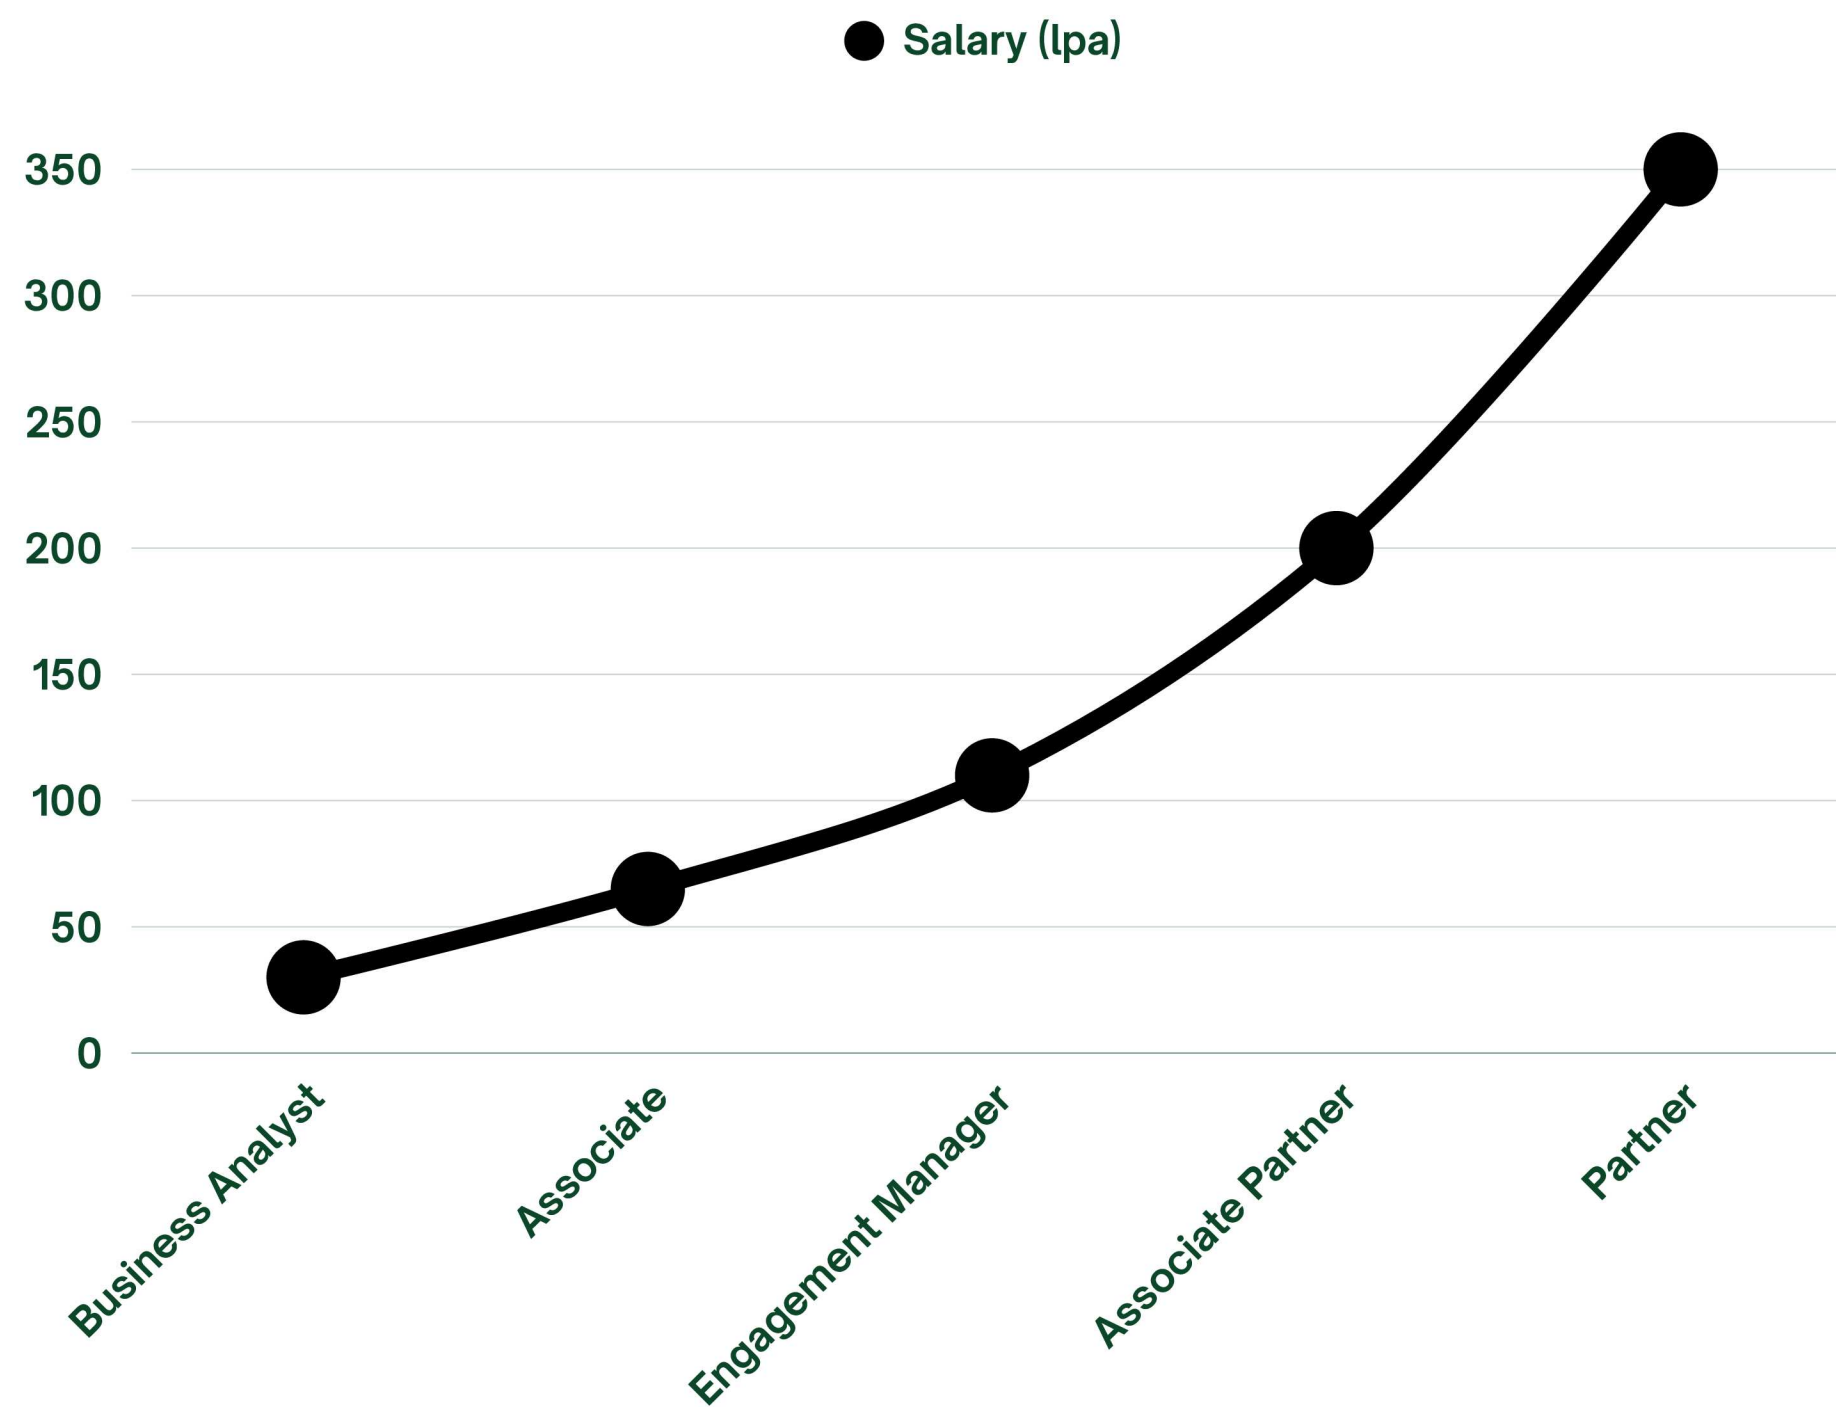

- Examples: HULT Prize, IIM/IIT National Case Comps, Deloitte Maverick, BLoC Boardroom

CAREER PROSPECTS & SALARY

0-2 years	Business Analyst
2-5 years	Associate
5-7 years	Engagement Manager
7-10 years	Associate Partner
10+ years	Partner

PROBLEM DIAGNOSIS 101

01

Read twice: First for context, second for identifying the core issue

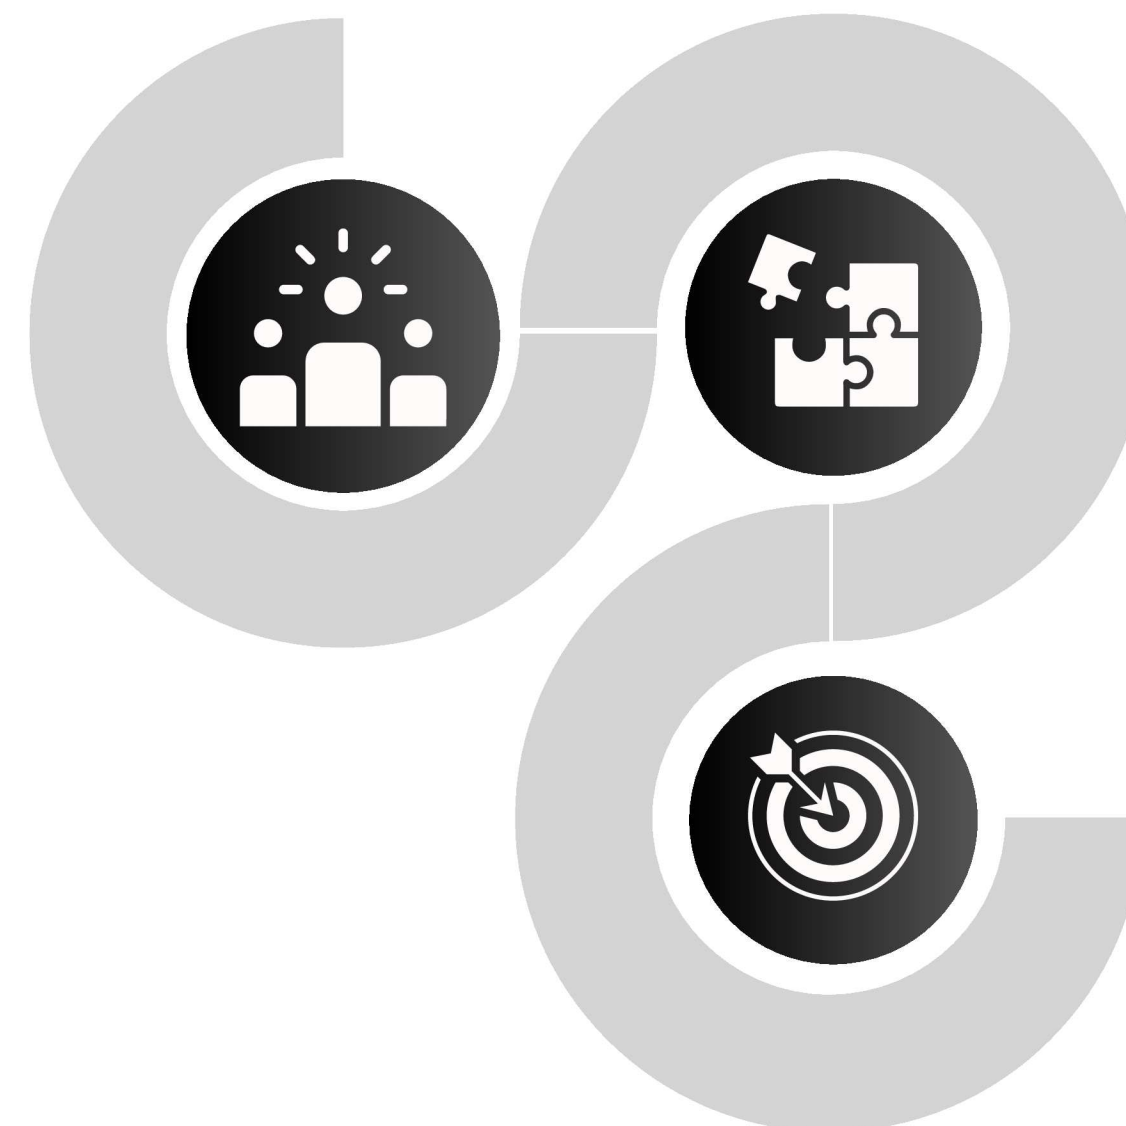

02

Identify:

- Stakeholders involved
- Industry and constraints
- Short vs. long-term objectives

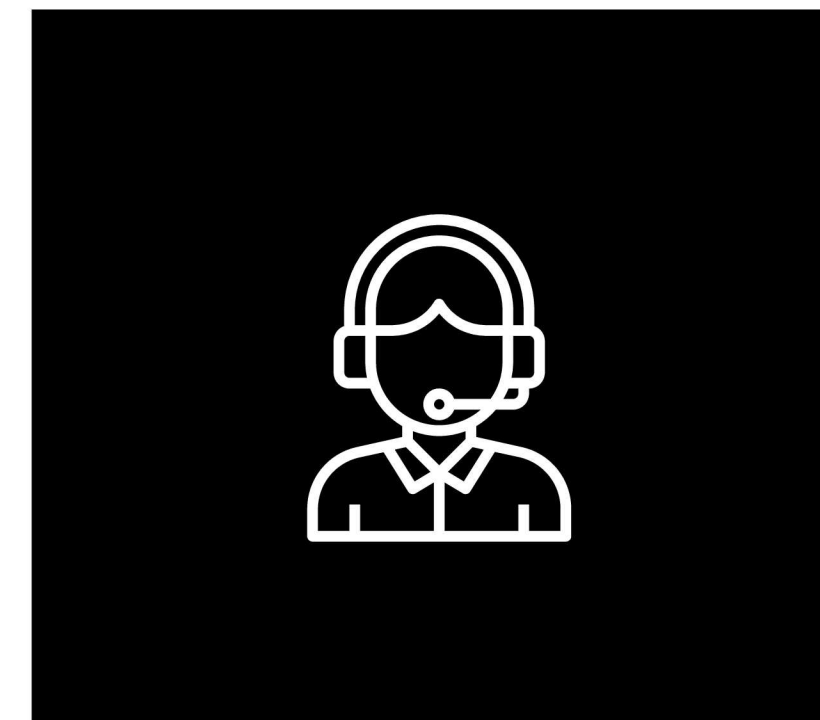

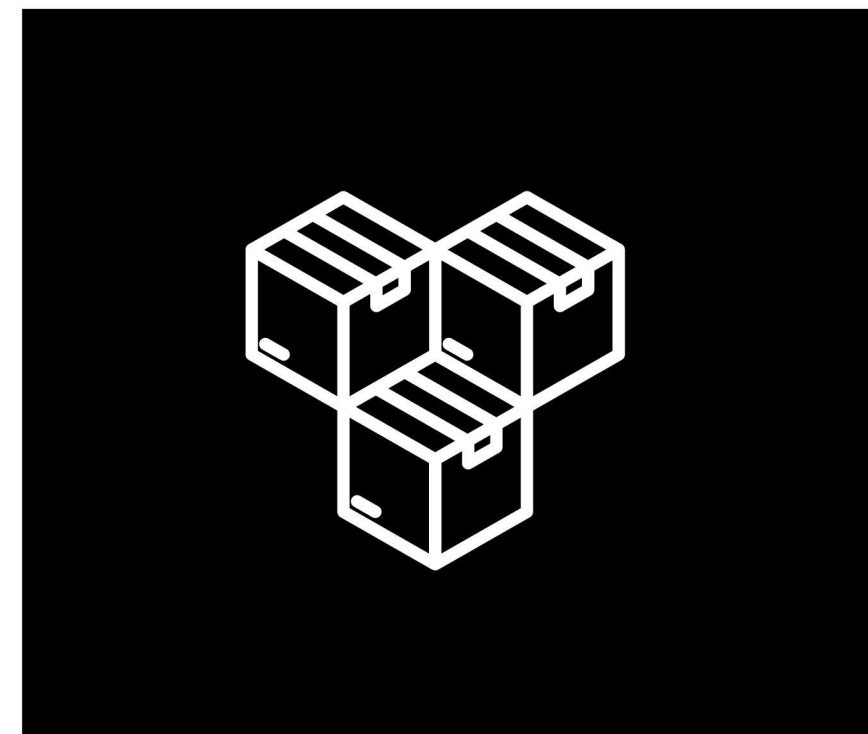

03

Ask: “What’s the real problem they’re asking us to solve?”

What judges look for?

- Structured problem-solving
- Innovation with feasibility
- Clarity in communication and presentation
- Business impact

FRAMEWORKS

SWOT Analysis

Strength
Weakness
Opportunities
Threat

Porter's 5 Forces

Industry Analysis

BCG Matrix

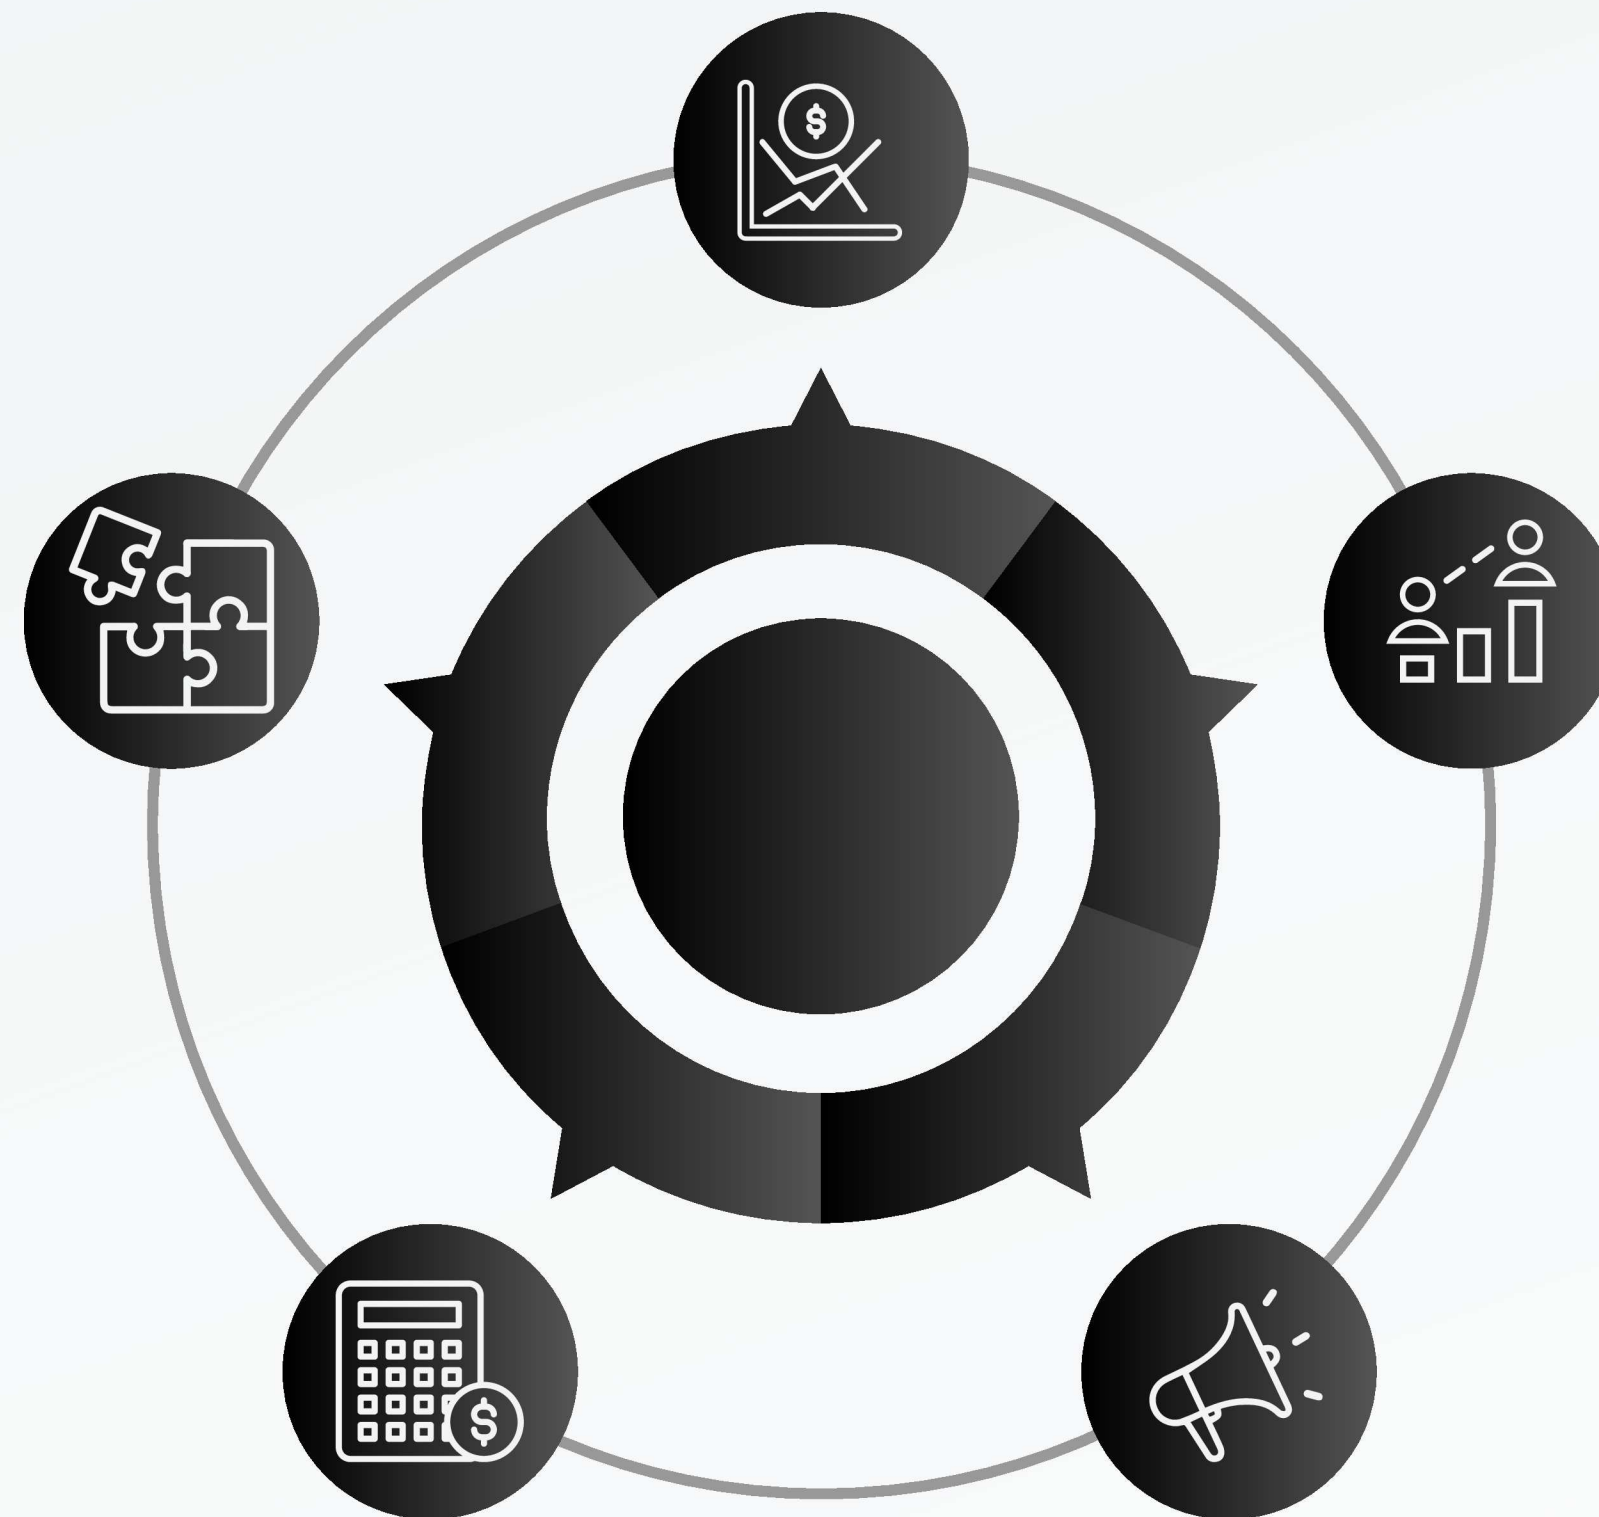

Portfolio
Planning

4 Ps/ 7 Ps

Marketing
Strategy

Customer's Journey Mapping

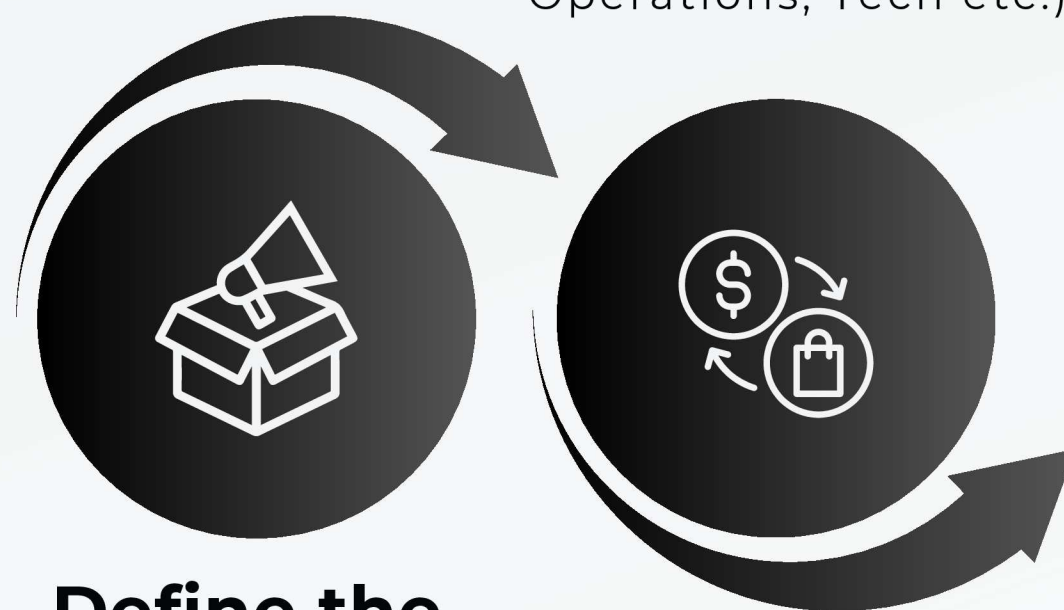

Identifying
Touchpoints &
Painpoints

STEP-BY-STEP BREAKDOWN

Segment the Problem

Break into sub-parts (Market, Operations, Tech etc.)

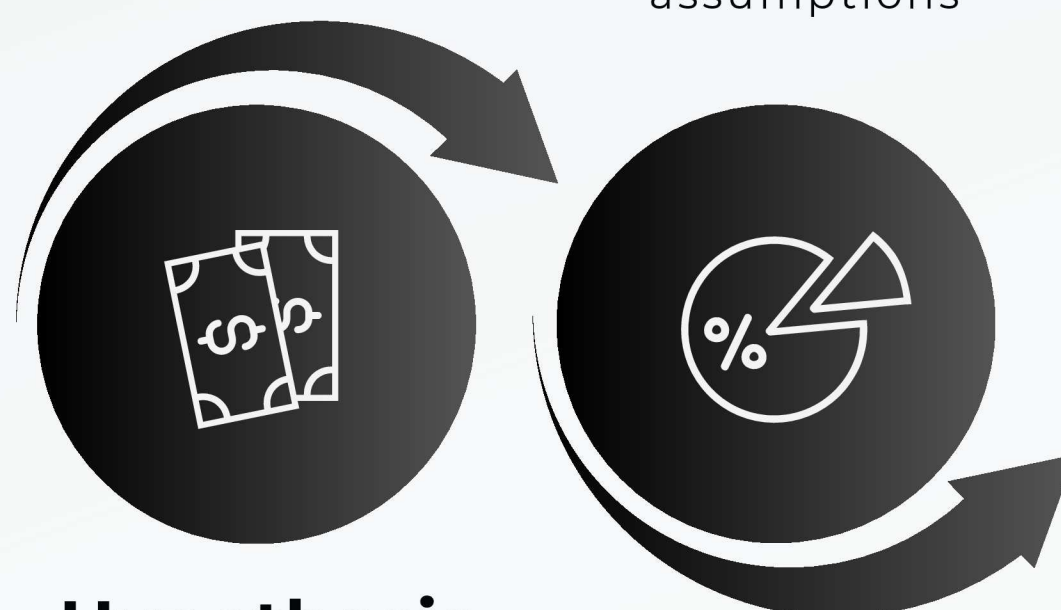

Define the problem clearly

Not symptoms, but root cause

Market/ Competitor Research

Validate your assumptions

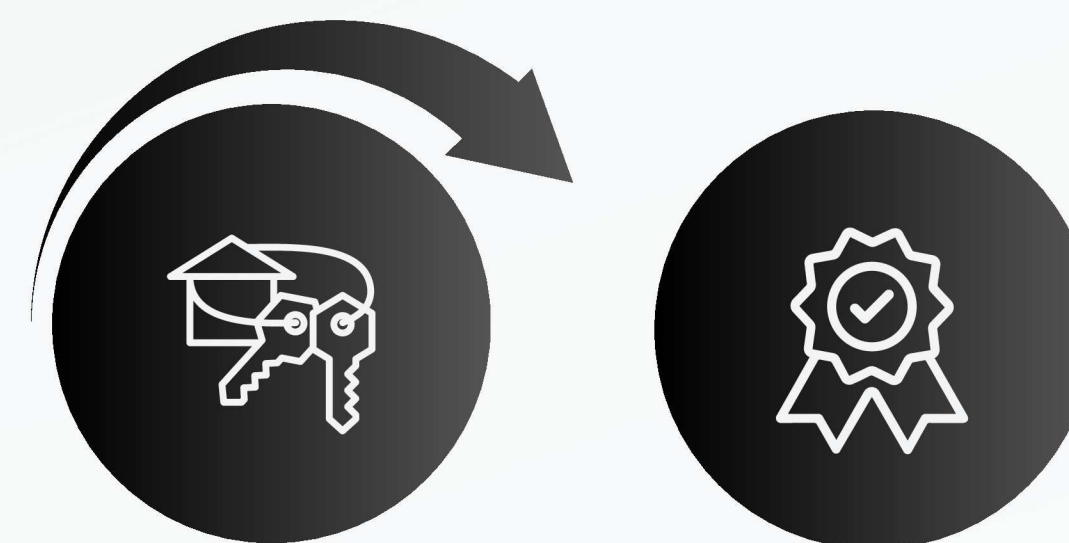

Hypothesis Building

What might solve it?

Implementation Plan

How, Who, When

Impact Analysis

Financials, KPIs, risks

Sample Case: Profit Decline

Client: Theatre Owner

Your Client is a Theatre owner, operating both cinema screens and a food and beverage section

Problem:

The client has been seeing a 30% profit decline for the past 6 months. The issue is specific only to our client and no other theatre in the area seems to have such a problem

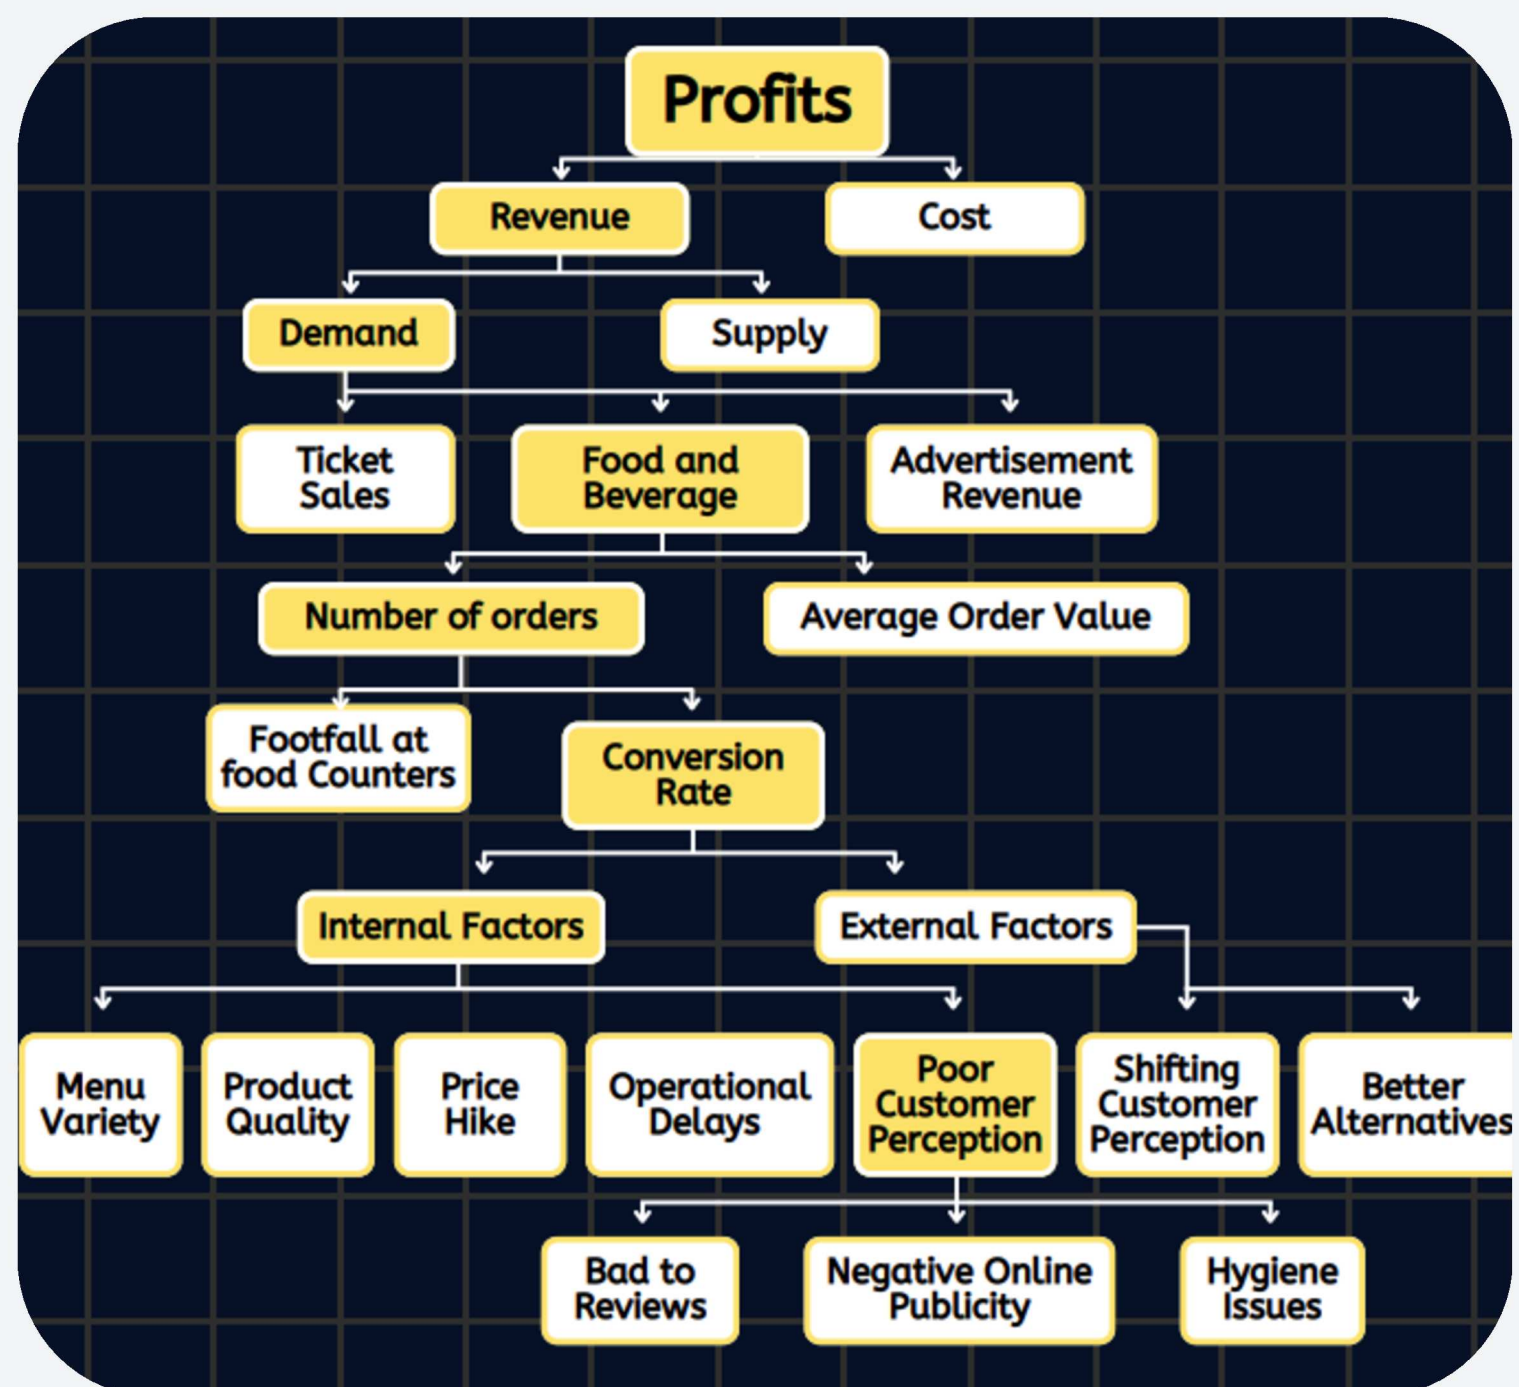

Objective:

Identify the root cause of the decline in profit and propose solutions for profit reversal, giving both short and long term recommendations

FRAMEWORK

Steps to solve a case in an interview

1) Clarify the Objective – Make sure you understand the client's goal

2) Structure the Problem – Summarize and present your initial framework

3) Ask for Data – Use data to validate or reject your hypotheses

4) Dive into Analysis

5) Prioritize Drivers

6) Synthesize Findings

7) Provide Recommendations

What Makes a Great Solution?

Innovation

Something fresh or unexpected

Feasibility

Grounded in Real World Constraints

Impact

Both short term & Scalable long term

Validation

With data or Industry Examples

COMMON MISTAKES TO AVOID

Overloading
slides with Data

No real Validation
or Market Research

Ignoring
Feasibility or Cost

Not Answering the
Actual Question

Lack of Team
Synergy in Speech

Speaking too Fast
or Too Slow

What is the primary reason for understanding the problem deeply before starting ideation?

To align your strategy with the stakeholder's pain points

To identify the keywords for framing your solution

To ensure your deck looks structured from the beginning
